

OraVet[®] Dental Hygiene Chews

Try your first chew **FREE!**

OraVet is not a treat...it's a *daily dental hygiene treatment* for your dog. As your dog chews, it creates a protective barrier that prevents bacterial attachment.

When bacteria can't attach to oral surfaces, they can't produce the biofilms that become plaque or the sulfur compounds of bad breath.

Try our 30 day challenge and win a 30 pack of OraVet!
